The Rise
AT MONTERRAZAS

LIVE ABOVE THE ORDINARY AT THE RISE AT MONTERRAZAS

Perched on the mountainside of Guadalupe, Cebu City, The Rise at Monterrazas offers more than just a residence, it offers a new perspective. A life where panoramic views stretch from the city to the sea, where every detail is designed to lift you higher, above the ordinary, above expectations.

VIEW FROM THE RISE

A VANTAGE POINT THAT REDEFINES LIVING

The Rise at Monterrazas sits approximately a thousand feet above sea level, offering residents a commanding view of the city, the sea, and the mountains beyond.

Each unit is meticulously crafted with livability as the primary focus, featuring spacious interiors and floor-to-ceiling glass windows that frame the breathtaking vistas.

The design strategically incorporates gaps between units to allow natural light and ventilation to flow freely, ensuring that your home feels open, airy, and connected to the world outside without sacrificing the privacy you and your family deserve.

01 UNOBSTRUCTED PANORAMIC VIEWS

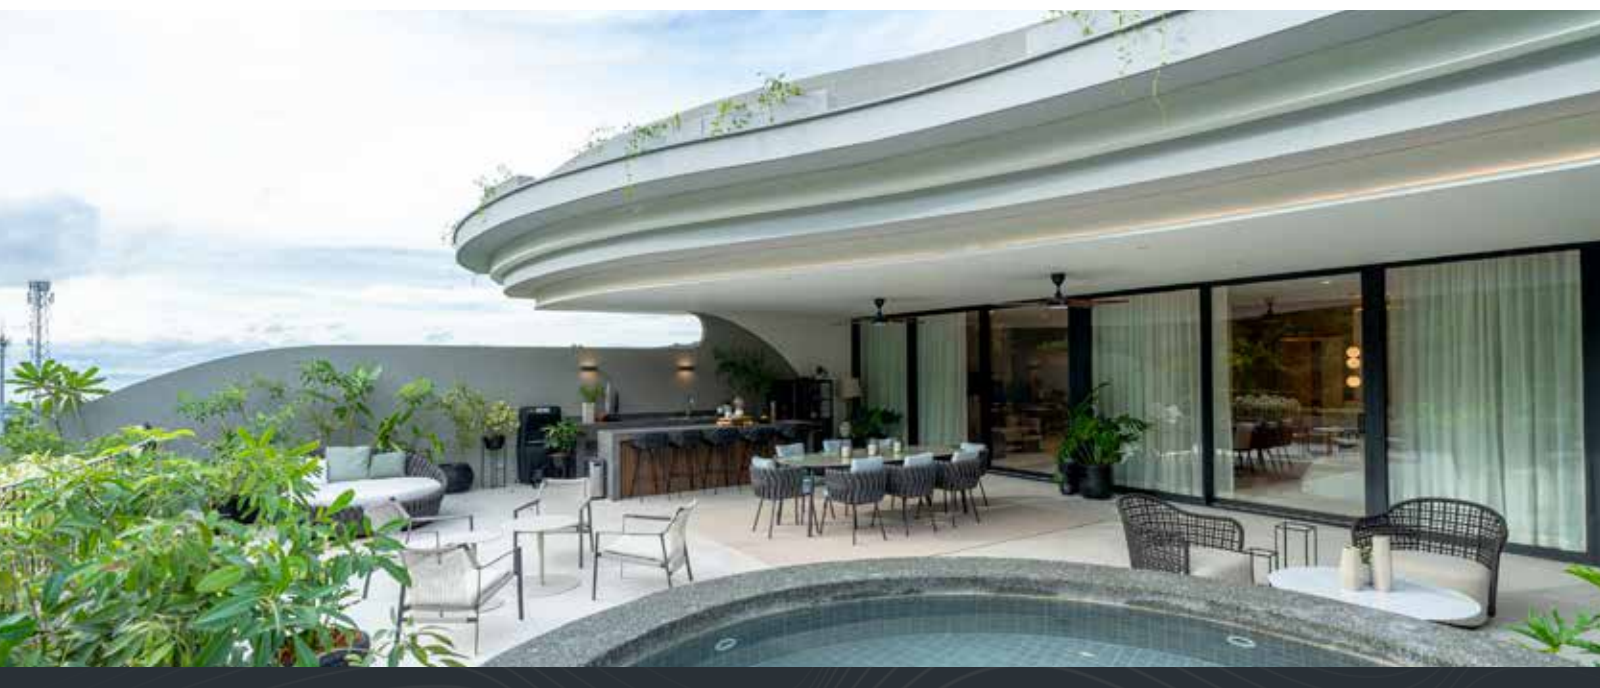

Unlike traditional high-rise buildings that may block views for lower floors, the terraced design allows each unit to "move higher," emanating the elevated lifestyle the development intends to offer. Unobstructed, uninterrupted, and unmistakably elevated.

02 EXPANSIVE OUTDOOR SPACES

The Rise redefines condominium living by integrating generous outdoor spaces into every residence, a feature that is increasingly rare in urban developments. Some units offer outdoor spaces ranging from 70 to 334 square meters, providing ample room for personal gardens, alfresco dining, or simply enjoying the fresh mountain air.

03 THOUGHTFUL DESIGN, EVERYDAY COMFORT

Elevation is also felt in the details. Every element of The Rise has been designed to enhance your daily experience, from the strategic placement of gaps between units to the careful selection of finishes. These gaps introduce sufficient natural light and ventilation, ensuring that your home feels open, airy, and connected to the natural environment. Inside and outside, you will find premium materials and finishes that reflect a commitment to quality.
