

PARKSIDE

AT MONTELAGO

Morning Swims, Sunset Floats

The Pool at Montelago

There's something about water that slows time down.

At Montelago, the swimming pool isn't just an amenity, it's part of nature's rhythm. A place where mornings begin with quiet laps and afternoons drift into sun-warmed stillness.

The elevated position takes advantage of Montelago's highland setting, providing open views across the amenity park.

A Pool That's More Than Just a Pool

01

FOR EVERYDAY USE

The elevated position takes full advantage of Montelago's highland setting, offering views that extend across the amenity park and beyond. Loungers and shaded areas line the perimeter, making it easy to stay for the whole afternoon.

03

DIRECT ACCESS

What makes this pool different from a typical resort amenity is its proximity. Parkside lots are positioned with direct access to the amenity block, meaning the pool is not a destination, it's an extension of home.

02

IT'S A LIFESTYLE

The pool is part of the daily landscape. It's where children learn to swim, where neighbors meet for weekend afternoons, and where quiet moments of reflection happen. There's no need to plan a trip or pack a bag. It's simply there.

04

A GENTLE INVITATION

If you've imagined a life where resort-style amenities are part of your everyday routine, Parkside at Montelago offers that reality.

Its location within the amenity park allows residents to combine activities within a single visit.
