

Designed for Movement and Stillness

The Walking Trails at Montelago

There's something about a walk that clears the mind and resets the pace.

At Montelago, the walking trails wind through the amenity block, connecting key spaces and offering routes for both movement and quiet reflection.

For Parkside residents, the trails are just steps from home. No need to plan a trip or drive for a refreshing walk. The trails begin where your lot ends.

Step Outside and Into Nature

01

DESIGNED FOR FITNESS

The paths vary in length and elevation, accommodating different fitness levels and preferences. Some trails offer gentle, flat terrain, while others incorporate the natural slope of Montelago's highland setting for a more varied walk.

03

CONNECTING PEOPLE & SPACES

The trails' connectivity encourages a walkable, community-oriented lifestyle. The trails also offer spaces for informal interactions: a nod between neighbors, a brief conversation, or simply the shared experience of being outdoors.

02

PROXIMITY & ACCESSIBILITY

The trails are integrated into the overall layout of the amenity block, making them easily accessible from any Parkside lot. This proximity encourages regular use, whether for a quick walk between tasks or a longer exploration of the full network.

04

PARKSIDE'S DAILY LANDSCAPE

The direct access that Parkside lots provide means the trails are not a destination to be reached, but a resource to be used spontaneously. This is what makes Parkside different: the amenities aren't separate from daily life, they're woven into it.
