

# The Rise

AT MONTERRAZAS

## A TRIBUTE TO FILIPINO HERITAGE AT THE RISE AT MONTERRAZAS

Nestled on a mountainside in Cebu, The Rise at Monterrazas is more than a condominium. It is a tribute to one of the Philippines' most treasured landmarks. Designed to mimic the cascading contours of the Banaue Rice Terraces, this architectural wonder honors Filipino creativity and craftsmanship.

### INSPIRED BY A 2,000-YEAR-OLD LEGACY

Often hailed as the "Eighth Wonder of the World," the Banaue Rice Terraces are an extraordinary engineering marvel created over 2,000 years ago by the indigenous Ifugao people.

Carved by hand into the steep mountainsides of Luzon, this "Stairway to Heaven" rises 1,500 meters high and is sustained by a remarkably advanced irrigation system from the surrounding rainforests.

Spanning thousands of square kilometers, this living cultural landscape, recognized by UNESCO, represents a timeless fusion of human ingenuity and nature's beauty, making it an enduring icon of Philippine cultural identity.

## 01

### CASCADING FORMS, TIMELESS BEAUTY

The 19-storey structure mimics the step-like cascades of Banaue, with each level receding gracefully into the next. The conforming curves ripple across the building like waves, echoing the organic flow of the original mountainside.

## 02

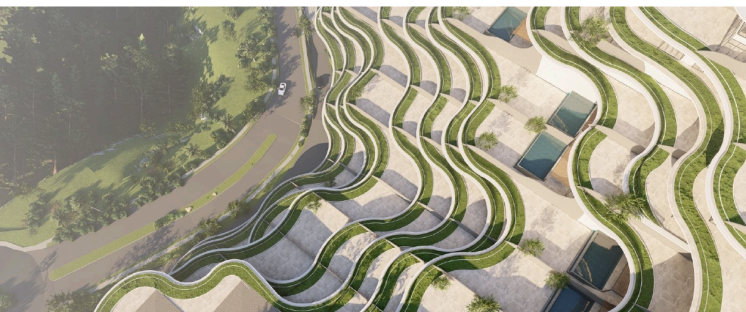

### AN ARCHITECTURE THAT FOLLOWS THE MOUNTAIN

Just as the Ifugao people carved their terraces along the natural contours of the Cordilleras, The Rise was derived from the original contour of its site in Cebu. Instead of imposing a rigid vertical structure, the design team "pushed everything towards the mountain and just worked with the terrain."

## 03

### MORE THAN A BUILDING, A SYMBOL

For the Ifugao, the rice terraces represent life, community, and spirituality. For The Rise, the terraces represent a commitment to excellence, sustainability, and Filipino pride. The Banaue Rice Terraces have inspired artists, architects, and dreamers for generations. Now, they have inspired a new kind of luxury living.
